BGLOBAL PLC

("Bglobal" or the "Company" or the "Group")

Good Energy Selects Utilisoft

Bglobal Plc (AIM: BGBL), the leading provider of smart metering solutions and energy information management services to the UK energy market is delighted to announce that its subsidiary, Utilisoft, has had its Dual Fuel Industry Data Management software solution selected by Good Energy to support the next stage in its growth as the UK's leading supplier of 100% renewable electricity. Utilisoft's software will replace the legacy systems that are currently in place at Good Energy.

Good Energy has selected software modules for new Electricity and Gas customer registration (**AFMS Avant**), industry dataflow and process management (**DataFlow.WEB** and **PFV**), along with Billing and CRM (**Futura**) - providing the ideal solution to underpin their ambitious growth plans.

Utilisoft's solutions will allow Good Energy to automate many of the key processes inherent in the electricity supply industry, providing considerable benefits to their business.

Matthew Hirst, Sales Director of Utilisoft, commented on the deal: "Good Energy is one of a new breed of energy supply companies leading the way in shaping the 'new energy economy' – an area that Utilisoft itself is deeply involved in and committed to. We are delighted that Good Energy has chosen our solutions to support what promises to be an exciting time – both in their evolution, and in the evolution of the industry."

Garry Peagam, Group Finance Director of Good Energy commented: "Utilisoft is the proven market leader in the field, and was the only logical choice for us when we were seeking to replace our legacy systems. With 30,000 customers in the UK and a growing community of over 2000 independent green electricity generators, Good Energy has ambitious plans to continue to grow our presence in the market, and Utilisoft has the experience and expertise to help us achieve our targets."

More Information

Good Energy has selected the following software modules, which form Utilisoft's Dual Fuel Energy Retail solution suite:

- **AFMS:** AFMS is a web-browser based solution which automates many of the manual processes that utility organisations manage on a daily basis, such as customer registration and deregistration, new connections, change of agents etc...AFMS eradicates manual effort by automating a range of key industry processes that demand extended interaction.
- **DataFlow.WEB** provides a modern web-based architecture and intuitive web browser user interface for viewing and creating industry dataflows (market messages).
- **Process Flow Viewer** provides a graphical, chronological view of dataflow activity for an MPAN or customer.
- **Futura Billing & CRM:** software application with sophisticated capabilities which enables electricity and gas suppliers to expand rapidly and launch services that place it in a very competitive position.
- **GateKeeper:** GateKeeper is Utilisoft's enterprise scale middleware solution that has been designed to satisfy complex, scalable integration requirements. It is a data hub that provides automated integration of two way communications between back office systems/applications and/or external organisations.

About Utilisoft

Utilisoft is a global provider of dedicated, expert software solutions to the energy and utilities sector. Its product based solutions are used by over eighty companies across energy trading, supply, metering and distribution-with a customer base, which stretches across Europe, the USA, Australasia and Asia.

Utilisoft is part of **Utiligroup**- the integrated group of companies providing client value to the energy and utilities sector. It combines Utilisoft (software products for UK, Europe and USA), Utilisoft PTY (software products for Asia Pacific) and Utiliserve (operational managed services and professional services deployed across the group).

Utiligroup is a subsidiary of Bglobal plc.

About Good Energy PLC

Good Energy is the UK's 100% renewable electricity supplier. All of its electricity is generated using the natural power of the wind, water and sun or through sustainable biogeneration. That means no carbon, no nuclear and no fossil fuels. No compromise.

By choosing Good Energy as their electricity supplier our 26,000 customers are helping to transform the UK energy market. For good.
