BGLOBAL PLC

("Bglobal" or "the Company" or "the Group")

Bglobal signs agreement with G4S Utility Services

Bglobal plc (AIM: BGBL.L), the market-leading provider of smart metering solutions to the UK energy market, is pleased to announce that it will be working on an ongoing basis with G4S Utility Services ("G4S"), one of the UK's largest national providers of metering and field services and part of G4S plc (LON: GFS.L), in order to support Bglobal's increased installation and service requirements.

Bglobal has been working on a trial basis with G4S since October 2009, and given the success of this trial period will be extending the relationship by increasing the volume and type of field services performed by G4S in parts of the UK on the Company's behalf.

Bglobal will be utilising G4S employees in various parts of the UK to install smart meters on behalf of the Company during 2010. The agreement will also allow Bglobal to outsource a number of field functions, such as regulatory manual meter checks which are required from time to time, to G4S.

Tony Barnes, Group Chief Executive of Bglobal commented: "Working with G4S will help us to quickly scale up our meter installation and field service programme in order to satisfy the burgeoning demand for smart metering in the UK business market."

Kim Challis, managing Director at G4S Utility Services, added: "We are very pleased to be able to support Bglobal in its roll out of smart meters across the UK: this programme plays to our strengths of being one of the UK's few fully independent National Service Providers."
