("Bglobal" or the "Company" or the "Group")

Bglobal and Transport for London – SMARTening London's transport infrastructure

Bglobal plc (AIM:BGBL), the leading UK smart metering and energy data company, is pleased to announce that it has signed a contract to install smart meters in buildings and property portfolio of Transport for London ("TFL").

Bglobal will supply, install and service its smart electricity meters across the capital, with a particular focus on bus stations, Victoria Coach Station, London River Services' piers, Dial a Ride Depots and sites along TFL's 'red route'. The contract involves the installation of approximately one hundred and fifty smart meters, and is expected to be completed in the first half of 2010.

Giovanni Nacci, Environmental Manager at Transport for London (Surface Transport) said: "We are very excited about starting our installation programme with Bglobal. The energy information that Bglobal's electricity smart meter will provide Transport for London will allow us to make smarter decisions on energy consumption and our carbon footprint."

Tony Barnes, Group Chief Executive of Bglobal commented: "Transport for London becomes another key partner for Bglobal, and we are proud to be supporting their efforts to make London a more energy efficient capital."
